

Marretti®

100 YEARS ASCENDING

GRAND DESIGN STAIRCASES

www.marretti.com

Marretti is dedicated to creating custom-designed staircases that meet the unique needs and preferences of even the most demanding customers, with no limits to creativity.

We work closely with architects and designers to ensure that every aspect of the project is considered, from the initial concept to the final installation.

Marretti intricately considers all aspects of the custom-made staircase, including materials, finishes, and interfaces, before our skilled artisans transform them into a beautifully hand-finished commission.

GRAND DESIGN STAIRCASES

OUR ROOTS: PASSION AND DEDICATION

Marretti has been crafting exceptional staircases in the heart of Tuscany since the 1920s.

The company is steeped in Italian heritage and prides itself on its commitment to traditional craftsmanship.

Decades of experience allow each staircase to be constructed with the utmost care and precision from the most skilled artisans.

Despite its long history, Marretti is unafraid to embrace modern technology and innovation as combines advanced design software with traditional craft techniques to create beautiful and functional pieces of art from classic designs to contemporary styles.

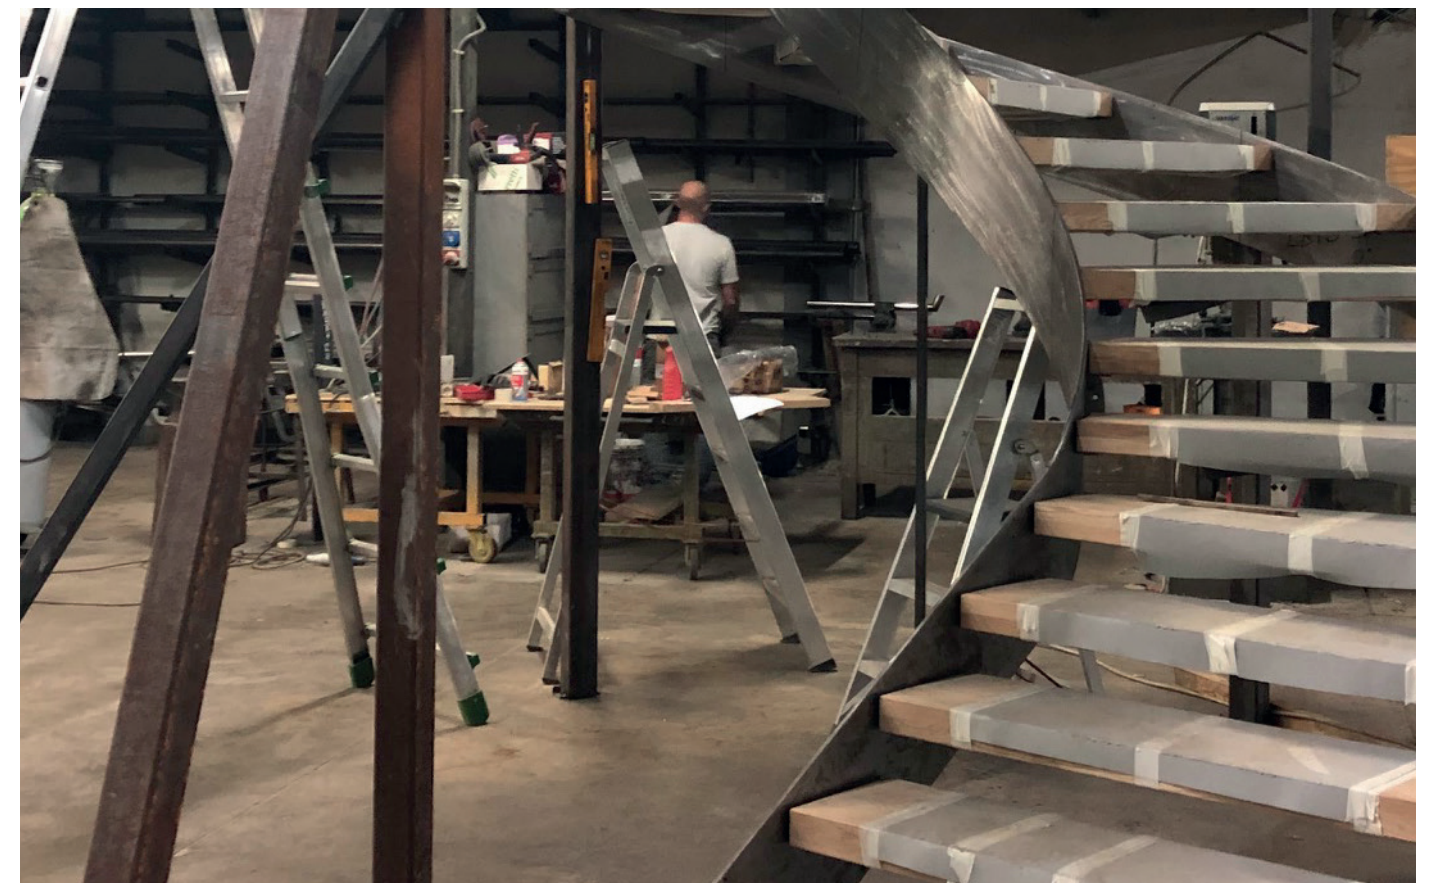

MADE IN ITALY

At Marretti, "Made in Italy" represents the highest quality, craftsmanship, and design synonymous with Italian culture. Our team of skilled artisans and craftsmen is committed to producing staircases that meet and exceed our customers' expectations. We source only the finest materials from suppliers and use traditional techniques passed down through generations to create stunning, enduring staircases that are truly unique.

"Made in Italy" is not just a label for Marretti; it is a commitment to excellence and a testament to our country's rich history and heritage.

PRODUCTION

Marretti produces in a 55,000 square feet plant in Florence, Italy. The manufacturing process includes wood, stainless steel and other materials, a robotic processing center (CMC), and a polishing, packaging, and assembly department. The company also has a separate factory for complex projects.

CUSTOMER CENTRIC

Marretti specializes in crafting completely customized staircases that are tailored to your preferences and needs. We work closely with each client to ensure that every aspect of their dream staircase is brought to life collaboratively.

QUALITY

Marretti's specialty is custom-made stairs that combine the timeless art of craftsmanship with cutting-edge techniques and the finest modern design materials. Crafted by the hands of trained individuals who have honed their skills for generations, these bespoke stairs are functional works of art. Each step is carefully carved and finished to perfection, resulting in a stunning visual display that blends seamlessly into any space.

INNOVATION

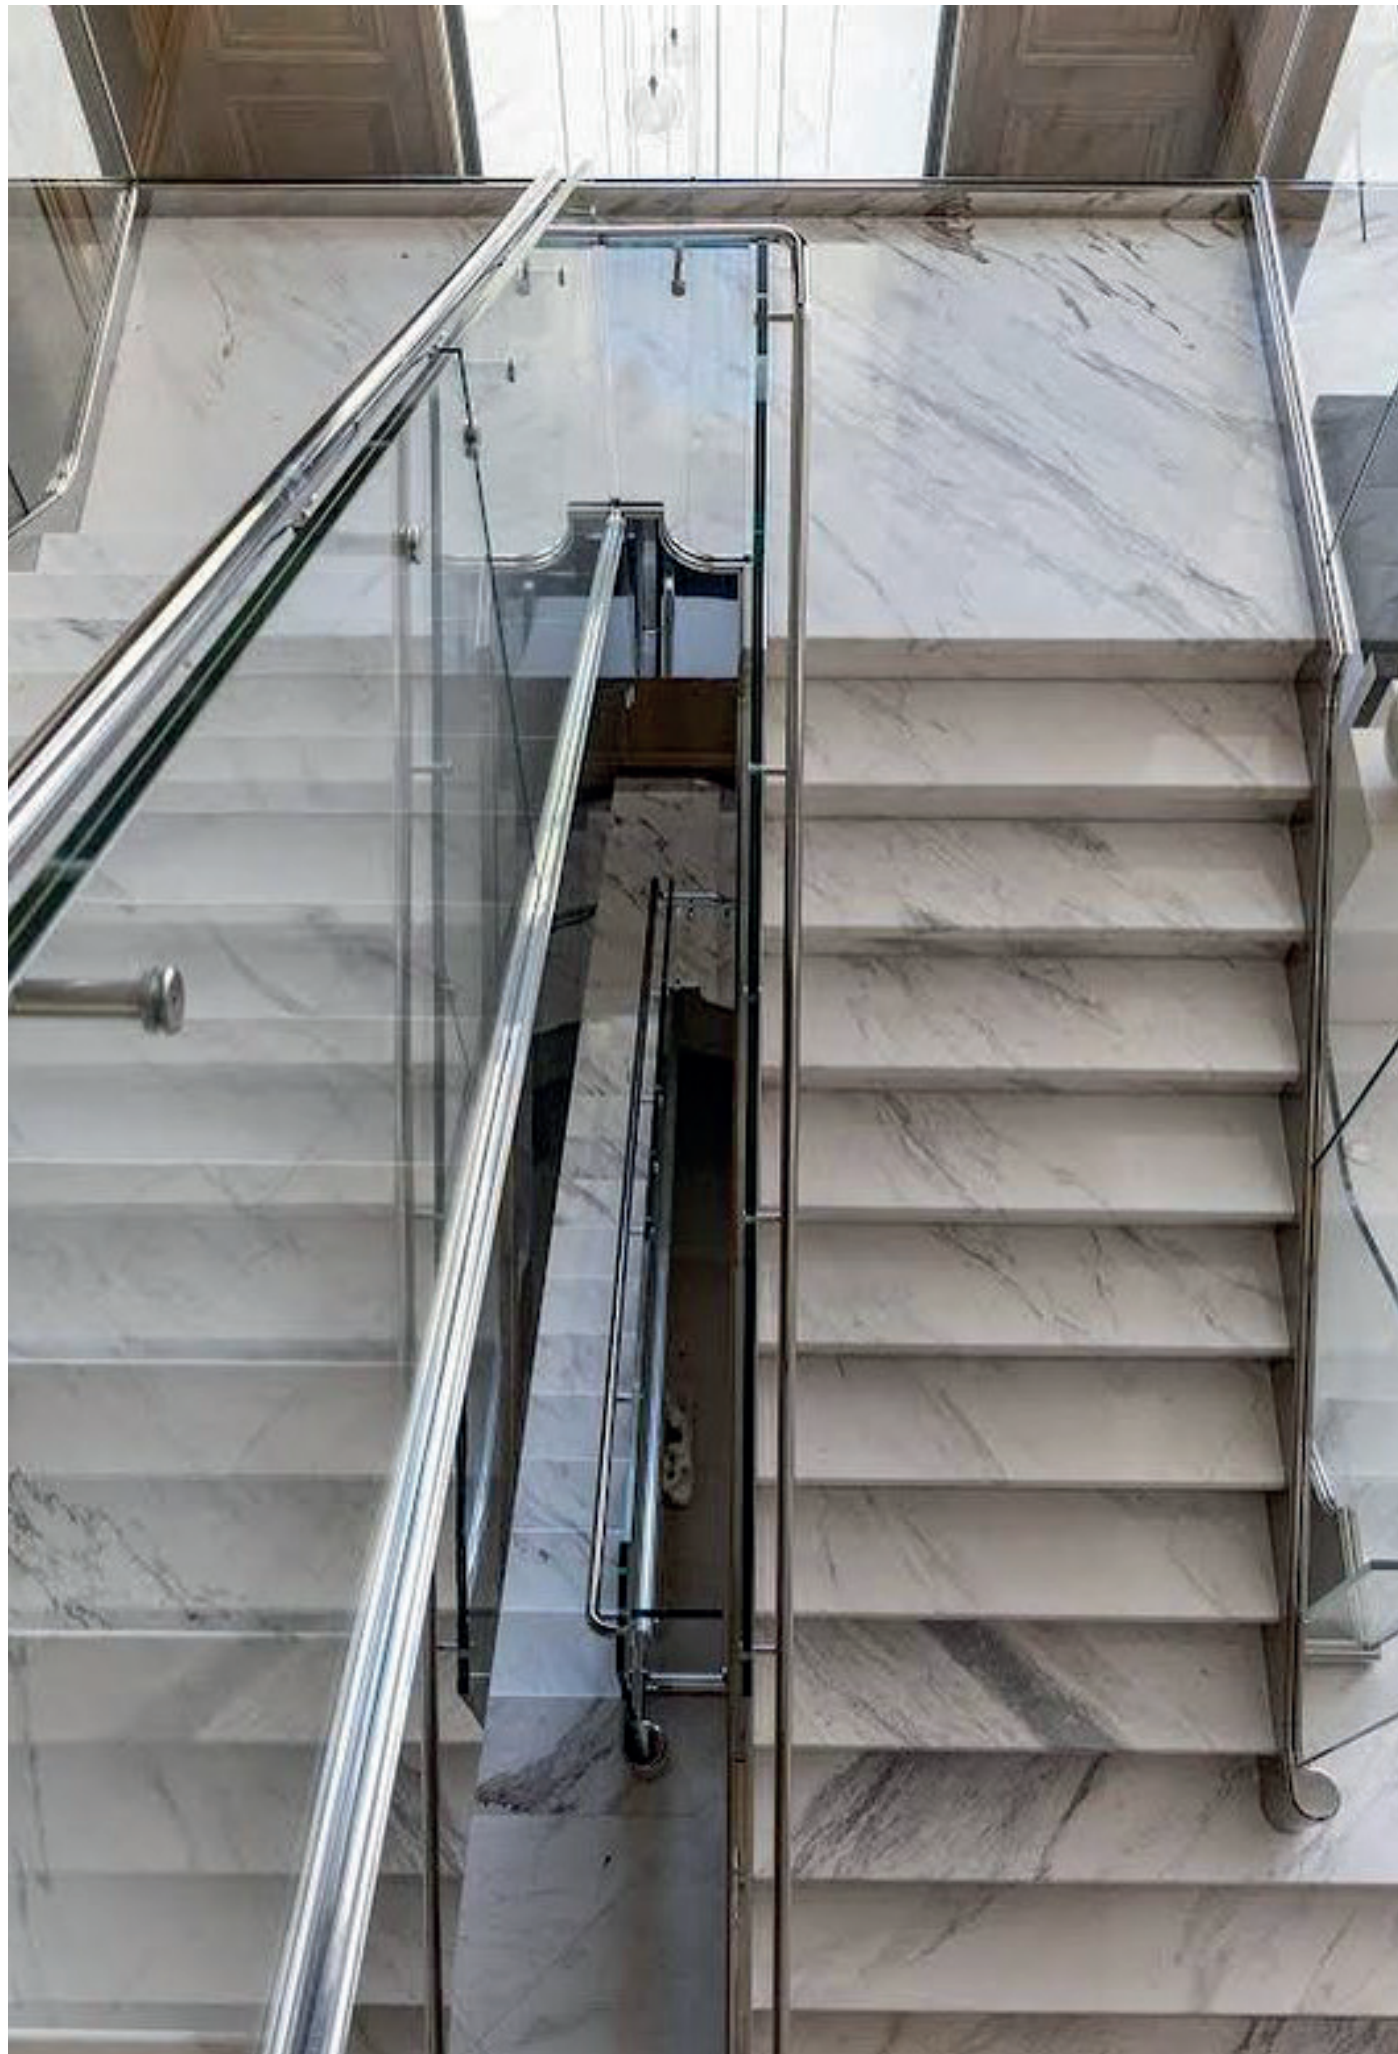

We are constantly seeking new ways to push the boundaries of traditional staircase design while maintaining the highest standards of quality and functionality. Our team of designers and engineers is continuously exploring new materials, techniques, and technologies to create staircases that are not only beautiful but also practical and efficient. We embrace challenges and enjoy the creative process of problem-solving to create truly unique and innovative staircase solutions for our clients. Innovation is the key to staying ahead of the curve in a constantly evolving industry, and we are committed to staying at the forefront of innovation in staircase construction.

IN PARTNERSHIP WITH
NASRALLAH
ARCHITECTURAL GROUP
ORLANDO FL USA

This project has a structure of polished
AISI 304 stainless steel, 1 inch thick,
with a shaped profile.

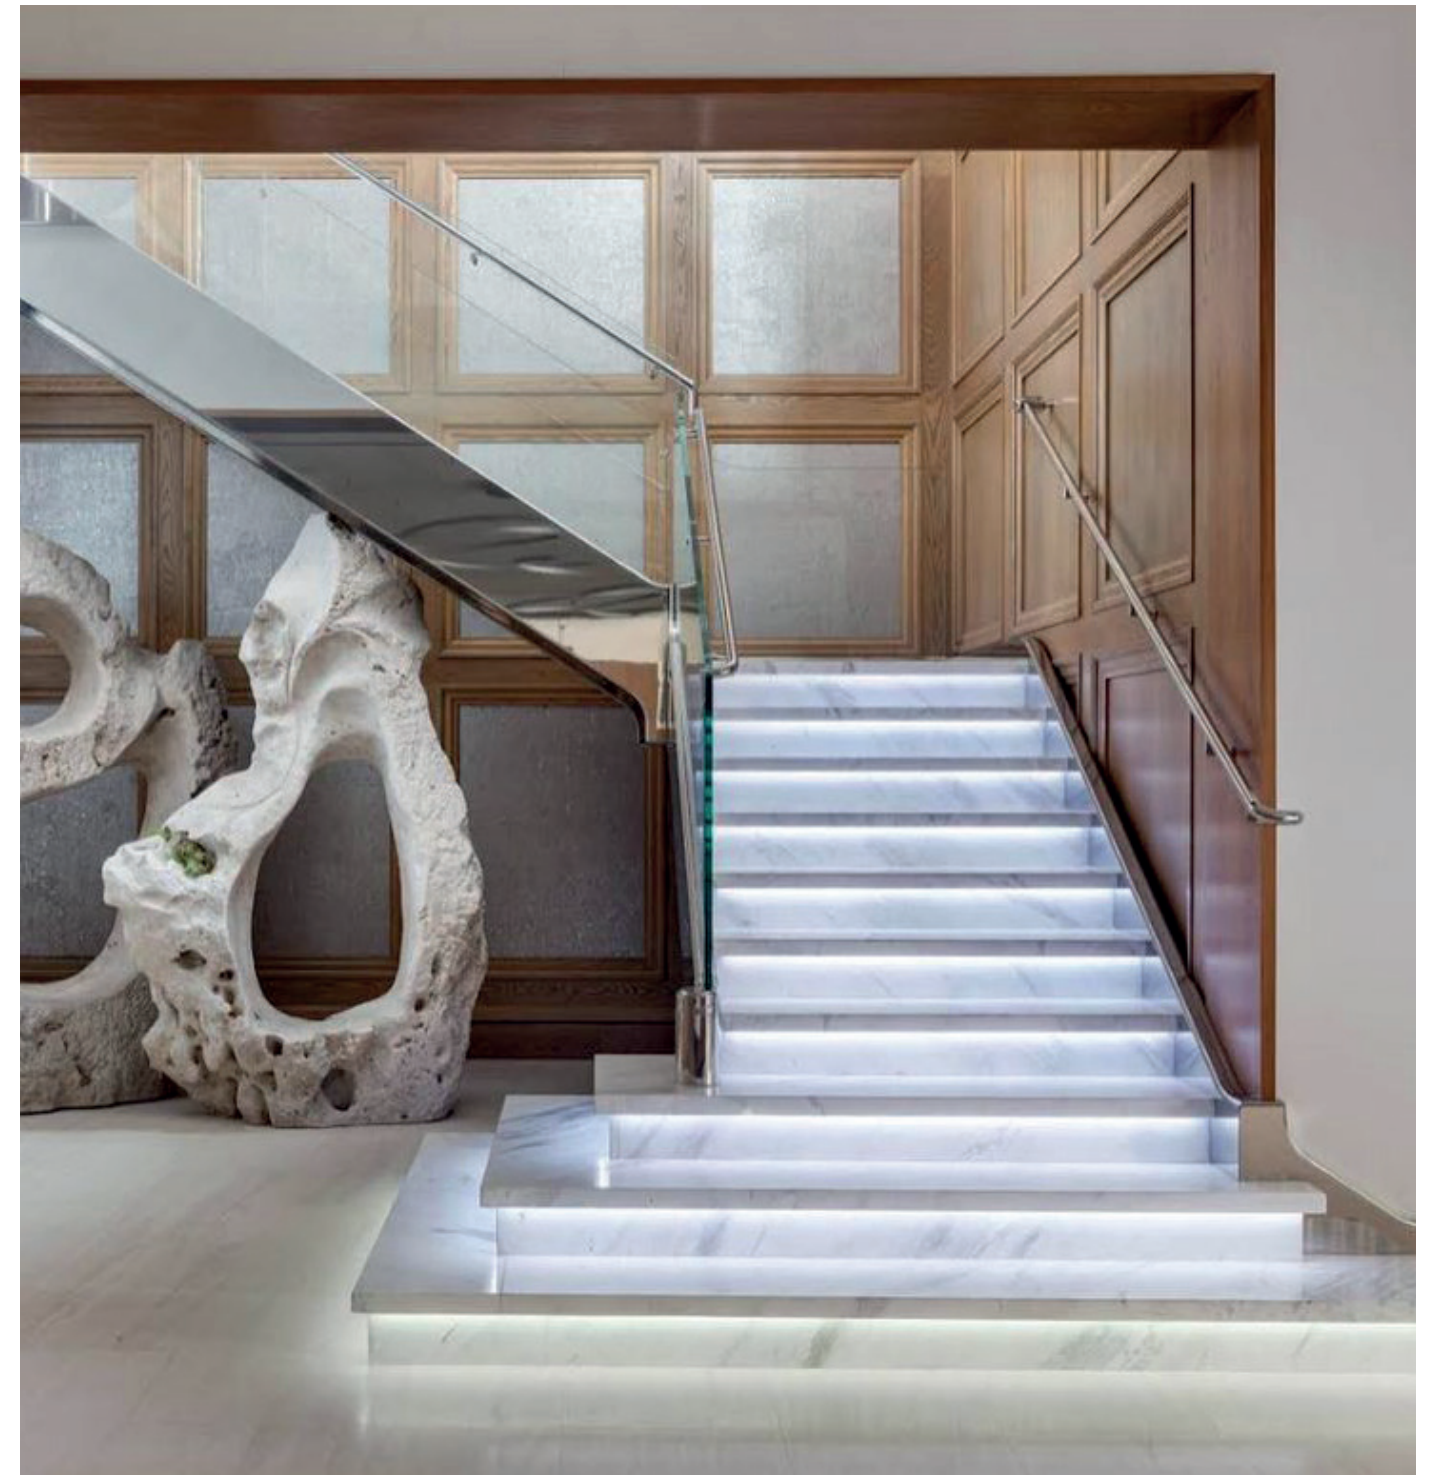

The steps and risers are made of
"Calacatta Gold" marble, 5 feet wide
and 2 inches thick, with LED lighting.

A SHOW STOPPING CENTERPIECE

The lower part of the staircase is covered with a panel of Walnut Burl. The railing is made of extra-clear tempered glass that is 1 inch thick and is inserted between the two polished stainless steel structures so that each fastening is hidden. Additionally, the handrail on the glass follows the staircase's design, with unique stainless steel posts at the beginning and end, designed by the architect.

IN PARTNERSHIP WITH
METHOD ARCHITECTS
NEW YORK NY USA

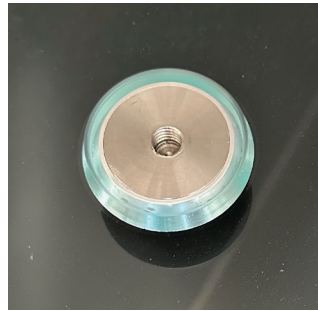

This staircase has a satin-finished AISI 304 stainless steel structure featuring steps made of extra-clear tempered glass 7 feet wide and 2 inches thick.

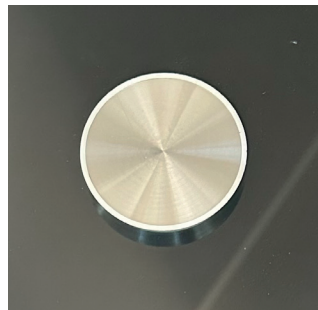

The top layer of the steps has an anti-slip coating and is attached to the structure with special patented hooks recessed into the glass, without the need to drill holes in the glass to keep the top surface intact.

The railing is also made of extra-clear tempered glass 1 ½ inches thick.

Additionally, all the glass has been laminated with the special anti-hurricane SGP (Sentryglas Dupont) plastic.

Patented stainless steel fitting, recessed into the glass.

Solid top glass surface without holes.

This spiral staircase has a double lateral structure made of polished stainless steel box sections, covered in 24K gold with steps made of 3 feet wide and 2 inches thick Black Marble.

THE MAGNIFICENCE OF CLASSIC

The staircase has a single-piece design that allows for fastening only at the start and end points. Furthermore, a unique out-of-tank galvanic finishing process was used for the 24K gold finish, developed explicitly for this project.

The steps are supported by polished stainless steel and are equipped with LED lighting both on the steps and inside the groove of the handrail carved into the structure's thickness.

10-foot-diameter spiral staircase with a double-sided structure.

The internal part of the staircase comprises a boxed system of 2 inches thickness in Hot Rolled Black steel, while the exterior design is coated with bronzed brass with a 4-inch thickness, and the handrail is recessed into the structure. The staircase has LED lighting on the steps and inside the recessed handrail.

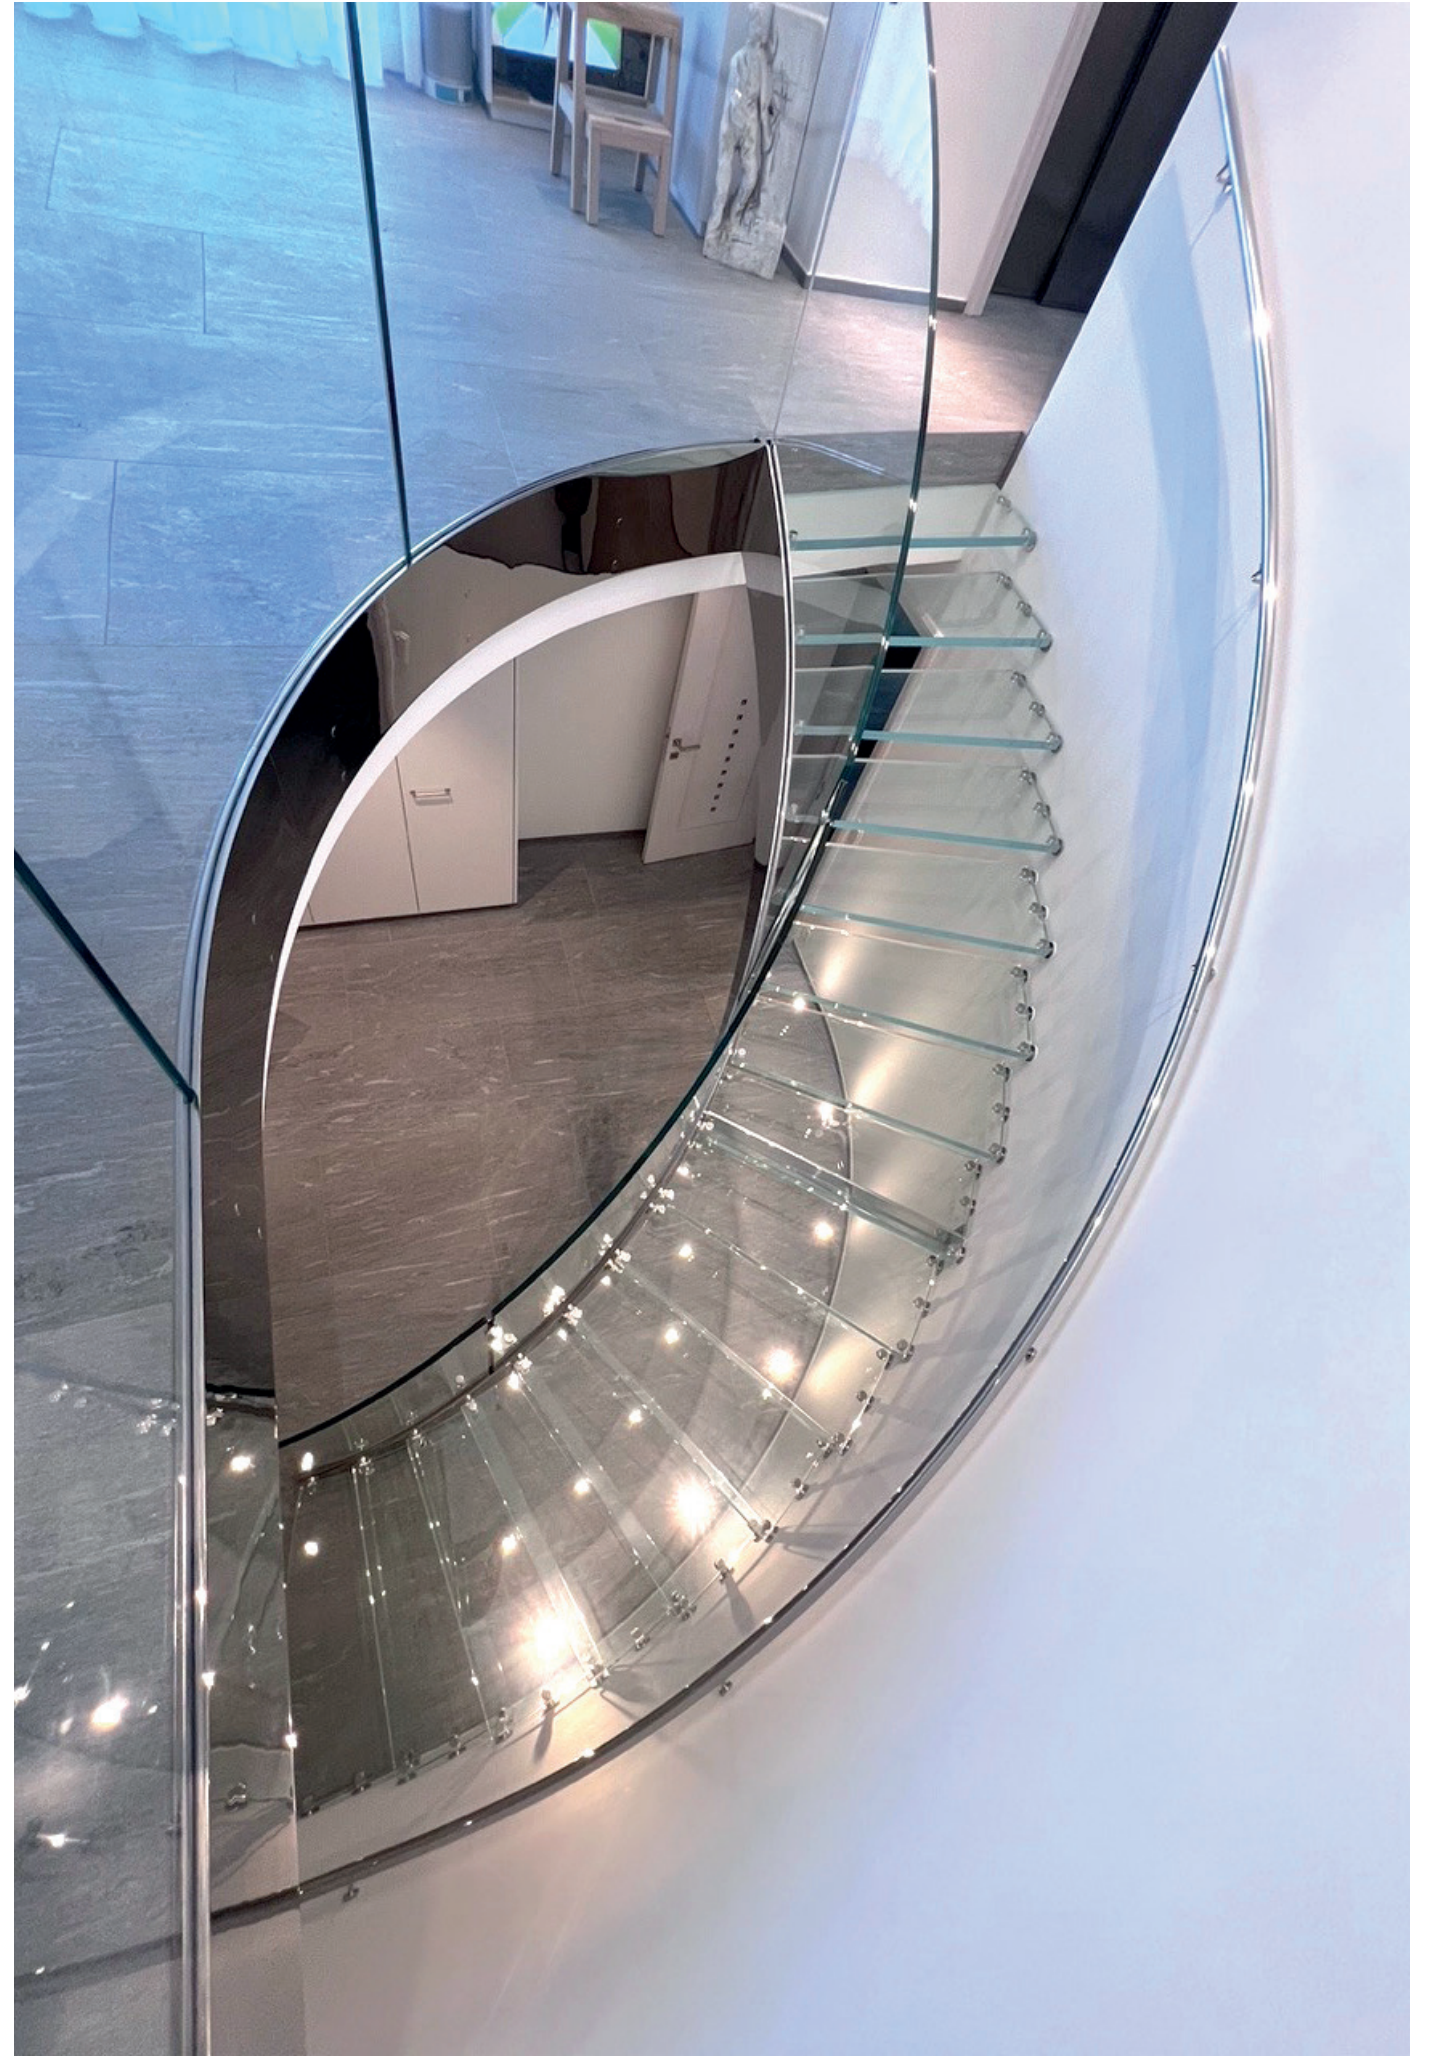

The steps are made of white Oak wood with a thickness of 6 inches.

IN PARTNERSHIP WITH
**ARCHITEKTURBÜRO
MAURO TREZZINI ZÜRICH
SWITZERLAND**

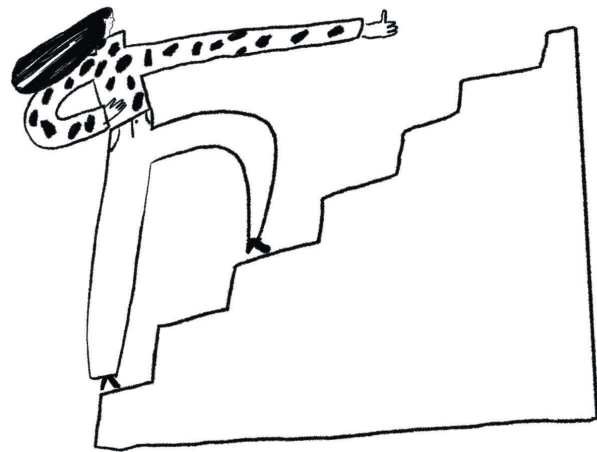

Spiral cantilever staircase with steps made of extra-clear tempered glass 10+10+10, featuring a double structure on the inner side made of polished stainless steel without visible screws, with a curved tempered structural glass 10+10 inside.

“ Giving an absolute commitment to our client to meet the highest possible standards in every step is integral to Marretti’s culture.
